Subject: Sequence search needed-RUSH

Point of Contact:  
Susan Hanley  
Technical Info. Specialist  
CM1 6B05 Tel: 305-4053

Jeff,

I need to have **SEQ ID NO:42** of **09/695,293** searched against the standard protein databases, including an interference search, as a **RUSH** job. The sequence is **845 amino acids long**. The case is a two-month amended case (election) due this (extended) biweek.

If this sequence is too long, let me know and we'll do what is necessary to get it searched properly.

Please forward this request to STIC.

For the STIC, I am:

James Ketter  
AU 1636  
308-1169  
mailbox located in CM1/11E12

Thanks!

Jim Ketter
